Veeam Management Pack for System Center
Unleash the power of System Center for vSphere and Hyper-V

REDMOND READER'S CHOICE AWARDS 2014 GOLD

"With Veeam MP, we identify and resolve an issue quickly because we have a clear view of the virtual and physical environments. We solve problems at least 10-times faster with Veeam."

**-Goran Zadravec,
Technical Team,
Kraš**
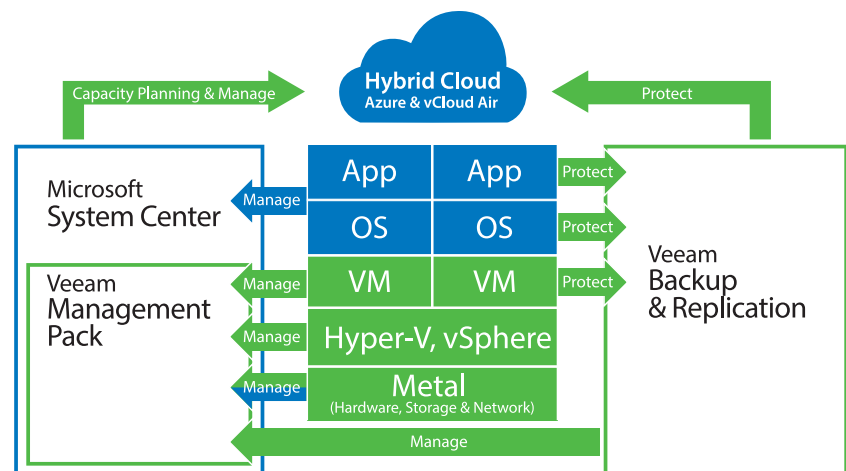

FEATURES AND BENEFITS

- Get complete visibility of Hyper-V and vSphere environments in System Center.

- See at-a-glance, real-time status in the Veeam Morning Coffee Dashboard™ and report.

- Monitor the Veeam Backup environment for your Always-On Business.

- Manage and plan for growth with capacity-planning reports.

- Predict resources needed to run your workloads in a hybrid-cloud.

- Get detailed snapshot and checkpoint tracking and reporting.

- Find problems fast and shorten the time between problem discovery and recovery.

- Increase data-center efficiency using analysis reports to right-size your VMs, find idle VMs and reclaim critical resources.

Veeam® Management Pack™ (MP) is the most comprehensive System Center extension for managing and monitoring VMware vSphere and Microsoft Hyper-V management and Veeam Backup & Replication™.

In today's Always-On Business™, your team must be armed with accurate system data to make informed, strategic decisions. Veeam MP provides *Availability for the Modern Data Center*™ with critical insights from monitoring dashboards, alert management, reporting and capacity planning to keep business and IT services running smoothly.

Complete visibility

For the true app-to-metal picture, enhance your System Center investment with a management pack that fully understands the relationship between your physical and virtual resources. Veeam MP delivers deep visibility of your entire environment, all from a single pane-of-glass within the System Center Operation Manager console.

Veeam and Microsoft System Center work better together to deliver app-to-metal visibility and protection.

Veeam MP gives you complete, real-time data to help solve problems fast and plan for the future. From the Veeam Morning Coffee Dashboard for a broad view of critical metrics to start your day, to detailed alert management and reporting, Veeam MP provides the visibility you need to manage your mission-critical applications and services.

Veeam MP

Veeam MP includes strategic, capacity-planning tools with reports that forecast and help model on-premises and cloud resources needed to efficiently power your business. This includes deep-dive reports on oversized and undersized VMs, zombie VMs, lost storage and real-time alerts to notify you if your Veeam Backup Repository will run out of capacity or if a Hyper-V or vSphere cluster will run out of memory.

Windows Server 2012 R2
Certified

Veeam Management Pack v8 for System Center is Microsoft-certified for Windows Serer 2012 R2.

Supported platforms

- Microsoft System Center 2012 SP1, R2, R2 Update Rollup 3 and later

- Microsoft Hyper-V Server 2012 and later

- Windows Server Hyper-V 2012 and later

- vCenter Server 4.1 and later, including vSphere 6

- Veeam Backup & Replication v7 and later

High-speed recovery

With the increasing demands for 24x7 application and service availability Veeam understands your need to shorten the time between problem discovery and system recovery. Veeam MP helps you quickly identify problems at the physical host, VM, and application layer. You immediately see where the real problem is and how it will affect business. As a result, your IT teams can eliminate the risk of blind spots, resolve problems faster and ensure SLA with greater confidence.

Verified protection

Veeam MP's real-time monitoring confirms both Veeam Backup job success and completion within the backup window. With Veeam MP's new detailed backup reports, you will know that you are ready to meet your recovery point objective (RPO). Veeam MP will proactively alert you if RPO targets are in danger of falling outside of desired ranges.

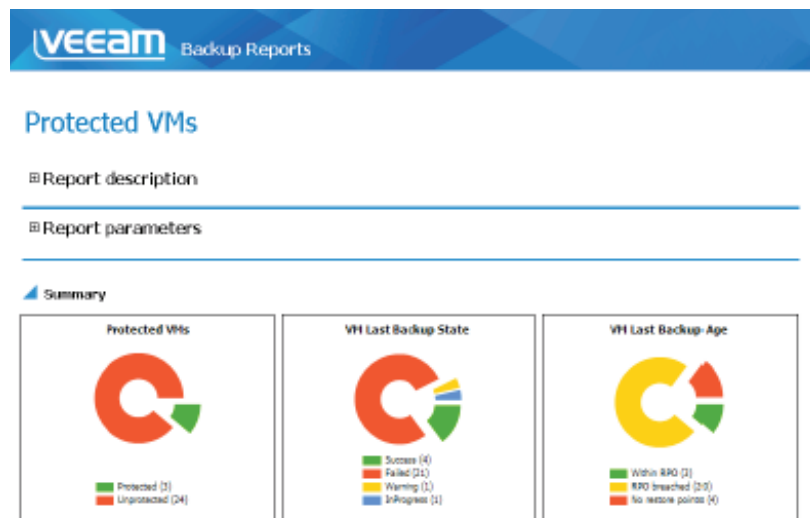

Figure 2. The protected VMs report analyzes backup protection of your VMs

The proactive monitoring in Veeam Management Pack, coupled with Veeam Backup & Replication's high-speed recovery, keeps the total time of outages and issues to a minimum. And with continuous visibility of the mission-critical virtualization and protection infrastructure, you know that your business data is available – and protected.

Veeam Management Pack for System Center is available in two editions to best meet your IT operations needs and budget.
